IKON 6

truematch

True Match® gives you access to the exact look you want to achieve on camera. Instantly dominate the close-ups with fantastic color-temperature, camera lut and dimming options. Access full saturated colors with hue angle color adjustments and input RGB values.

True Match® makes on-board control quick and easy for board operators to remotely configure and operate Celeb IKON via RDM and DMX. LumenRadio wireless DMX comes standard, with the option to choose Multiverse wireless DMX at the time of purchase or change any time through our service center.

CELEB

IKON 6

The Fullest Spectrum White Light

Achieves utmost naturalism and accurately rendered skin tones and the highest spectral quality white light. Equipped with two full-spectrum white sources designed to deliver the broadest spectrum white light.

The Brightest Colors

Excels not only as a full-spectrum white light generator that reflects the broadest range of color back to camera, but also as a color projector delivering the widest gamut of the brightest colors.
