

# AURORIS

## A NEW DIMENSION OF LIGHTING

This full-color overhead light source combines high-quality color rendition and precision control in one sleek, easy-to-use package. Powered by LiteGear's Spectrum technology, Auroris is built with 24 large format pixels, creating a pixel mappable source that can cover a 100-square-foot area with just one fixture. Designed to be light on weight and easy to rig Auroris is one of the slimmest, most versatile soft lights period. The game of large area overhead lighting is forever changed.

Available for Pre-Order Now. Shipping End of May 2022.
